

Hotel Rezydent Sopot MGallery Collection on the road to sustainability

Hotel Rezydent Sopot MGallery Collection is proud to announce a series of measures to promote sustainability and protect the environment. As part of our efforts, we aim to minimize our negative impact on the planet and create a better future for generations to come.

****Green Key Certificate**.**

Hotel Resident Sopot has earned the prestigious Green Key certificate, which demonstrates our commitment to environmental protection. Thanks to implemented practices, such as water and energy conservation and activities that promote the conscious use of resources, we have become part of a global network of hotels that care about sustainability.

The **Fight Against Food Waste.**

In an effort to reduce food waste, the hotel has introduced a number of initiatives to optimize its culinary processes and inventory management. We work with local charities to donate surplus food, and educate our guests about conscious consumption.

****Limiting single-use plastic**.**

In an effort to combat plastic pollution, Hotel Resident Sopot has reduced the use of single-use plastic products. We have introduced eco-friendly alternatives such as biodegradable dishes and reusable accessories to minimize our environmental impact.

****Reducing electricity consumption**.**

We plan to reduce electricity consumption by 5% in 2024 compared to 2023. Our measures include upgrading lighting to LED and implementing smart energy management systems, which will contribute to further energy savings and efficiency.

**** Establishing a water consumption baseline**.**

We intend to establish a water consumption baseline in 2024, which will allow us to monitor and optimize our water resources. These measures are aimed not only at saving money, but also at raising awareness among our guests and employees about the value of water.

****Calculation of carbon footprint**.**

Hotel Resident Sopot systematically calculates its carbon footprint to identify areas for improvement and implement appropriate reduction measures. Our goal is to reduce CO2 emissions and promote sustainable practices among our partners and suppliers.

****General CSR reporting to Accor chain headquarters.**

All of our corporate social responsibility (CSR) activities are regularly reported to Accor chain headquarters. This allows us to share our achievements and experiences, as well as inspire other properties to take environmentally friendly initiatives.
