

A story enchanted in detail

Each element of our badge is a deliberate symbol — carefully designed to tell the story of a place where tradition meets modernity, and nature meets architecture.

The lines of the badge subtly refer to the architectural form of our hotel. It echoes the elegant forms and modern solutions that define its unique character. When you look closer, you will see inspirations drawn from the interior of the lobby — a space that welcomes guests with warmth and sophistication.

The natural shapes and textures symbolize the hotel's constant dialogue with the surrounding nature. The soft lines represent sand and water – integral elements of the Baltic Sea landscape. They form the framework of the experience we offer our guests – closeness to nature, relaxation, and harmony.

The outer contour of the badge resembles a horse racing track – a discreet reference to the history of the region and its elegant sporting spirit, where dynamism and tradition intertwine.

The whole is complemented by colors inspired by the Baltic Sea and the hotel itself – deep blue of the sea, sandy beige, subdued grays and greens, and accents of gold, which add nobility and prestige to the whole.

This badge is not just a sign – it is a story about a place that invites you to feel, understand, and remember it.
